

Thank you for choosing "Lemmus Theme" another WPfeed.com theme. Here are some things you need to adjust before using this theme. We tried to make things easy for you.

## First thing

Upload "Lemmus theme" to your wp-content/themes directory. Under Appearance tab, activate "Lemmus theme".

## In general

If you need some dummy data to play around with:  
You can import the Lemmus\_dummy\_data.xml  
go to tools → import → choose wordpress  
and import Lemmus\_dummy\_data.xml.

### Images

All main images in portfolio and blog should be 800px width and 236px height. Make sure all your main images are that size. Images inside posts can be any size you want.

### Menu

You can use the customized menu feature under appearance. If you don't use a customized menu, the pages of your website will appear in the menu.

### Widgets

There are 3 widgets areas.  
Two in the footer and one on the sidebar.

## Home Page Carousel

The jQuery carousel placed at the top part of the home page is the place where you can show you portfolio.

Under portfolio Tab choose → new portfolio

Give a name to your work.

In content you can fill any info, text, video or image.

If you use an image inside the content area, make sure it links to itself (click edit image and choose link to image under Link Url) and give it a class called: fancybox (under advanced settings tab fill the CSS Class in Advanced Link Settings with the word: fancybox).

\*\*remember – each image on the whole theme that will get the class "fancybox" will open in a designed popup.

Add image in featured image: 800px width and 236px height.

Enter url of the work

Choose to show on carousel

Or

Choose to show on homepage sidebar

Or

Choose none to display only on portfolio page

## Portfolio

Create a page and call it portfolio.

Choose portfolio template

Later → enter the portfolio page url to the Lemmus theme options.

## Blog

You may use regular posts as well

The featured image should be  
800px width and 236px height.

Create a page and call it blog

Choose blog template.

## Contact us

We are using contact form

We also created style for the form elements

Insert class:text after the input tag, like this:

Default plugin tag:

```
[text* your-name]
```

Replace with this:

```
[text* your-name class:text]
```

here's the whole code:

```
<p>Your Name (required)<br />  
  [text* your-name class:text] </p>
```

```
<p>Your Email (required)<br />  
  [email* your-email class:text] </p>
```

```
<p>Subject<br />  
  [text your-subject class:text] </p>
```

```
<p>Your Message<br />
  [textarea your-message class:text] </p>
```

```
<p>[submit "Send"]</p>
```

## Theme Options

Under Appearance tab you should see "Lemmus Options"  
Here you can fill some info into the theme

Your Facebook, Twitter and RSS URLs → this will show up in your footer icons.

Fill homepage about us text – you can fill the title, text and image.  
Fill homepage what we do text – you can fill the title, text and image.

Enter the portfolio page url to the Lemmus theme options.

# ENJOY!
